FIG. 11

A schematic diagram of a rectangular device, likely a liquid crystal display panel or similar electronic component. The device features a large central area (32) filled with numerous closely spaced vertical lines. This central area is surrounded by a complex border structure. On the left side, there are several rectangular cutouts or openings, some labeled with reference numerals like 62a, 63a, 45, 71b, 43, and 61b. Similar structures are present on the right side, labeled with 62b, 43, 85a, 41, 75, 43, 34, 41, and 61a. The top and bottom edges also show various structural details and labels such as 43, 72a, 41, 63b, 45, 71a, and 43. The overall design suggests a highly integrated and specialized electronic assembly.
